📄 Summary

Actively targeting **₹18 LPA+ AWS Cloud Engineer** roles with hands-on experience in cloud-native projects, deep understanding of AWS services, and a clear certification roadmap (SAA-C03 in progress). Backed by 5 years at Amazon in data-focused roles and currently building a strong foundation through real AWS implementations and CLI-based automation.

📄 Projects

📄 AWS S3 Static Website Hosting with IAM & CLI Automation

GitHub: [Project Folder](#)

Duration: July 2025

Summary:

Deployed a fully functional static website using Amazon S3 with versioning, bucket policies, and public access configuration. Performed automation of the entire hosting lifecycle using AWS CLI.

- Created secure S3 bucket with static hosting enabled.
- Configured bucket policy and BPA to allow public access.
- Deployed HTML content and verified live access via S3 endpoint.
- Implemented end-to-end through IAM user and CLI tools (no console usage).

Tech Used: S3, IAM, AWS CLI, HTML, JSON Policies

Outcome: Public website hosted using CLI with secure access settings.

📄 Work Experience

Amazon Development Centre (India) Pvt Ltd

Associate – Retail Process, CMT Ops

Sep 2023 – Present

- Supporting retail catalog operations for product data enrichment and accuracy.

Data Associate – Alexa Language & Data Operations

Apr 2021 – Aug 2023

- Scraped structured data from publicly available websites (restaurants, hospitals, hotels, etc.).
- Uploaded location-based metadata to S3 buckets.
- Improved Alexa's ability to respond to local search voice queries like:
"Alexa, where is the nearest hospital?"

Data Associate – Alexa Data Services

Sep 2020 – Mar 2021

- Annotated and processed voice data for NLP models.
- Ensured data quality for training Alexa's language understanding systems.

📄 Skills

- **AWS:** S3, EC2, IAM, CLI, Static Hosting, Security Groups, EIP, Apache on EC2
- **Tools & Platforms:** Git, GitHub, Ubuntu/Linux, VS Code
- **DevOps Concepts:** SSH Key Management, CLI Automation, Server Hosting
- **Languages:** HTML, Bash, Markdown

📄 Certification Path

- 📄 **AWS Certified Solutions Architect – Associate (SAA-C03)** – In Progress
- Daily practice via CLI and real-world AWS scenarios
- Certification scheduled for October 2025

📁 GitHub Portfolio

- 📁 [aws-120days-journey](#)
Hands-on documentation of 120-day transformation journey with projects, architecture, CLI usage, and learnings.

📁 Personal Attributes

- Truthful | Calm | Focused | Spiritually grounded
 - Committed to building a meaningful tech career with purpose and integrity
 - Seeking a role where real skills and real work are valued over artificial experience
-
